

MaxDetect offers humidity & temperature sensor solutions with unique and reliable performance. Sensors models are available with analog and digital outputs, and are suitable for both end users and the OEM.

## Sensors & Meters

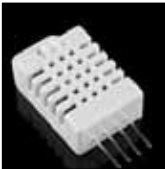

### RHT01

Digital relative humidity & temperature sensor. Calibrated digital signal via one wire bus.

### RHT02

Digital relative humidity & temperature sensor. Calibrated digital signal via one wire bus.

### RHT03

Digital relative humidity & temperature sensor. Calibrated digital signal via one wire bus.

### RHT04

Digital relative humidity & temperature sensor. Calibrated digital signal via one wire bus.

### RHT05

Digital relative humidity & temperature sensor. Calibrated digital signal via one wire bus. Standard cable length is 25'.

### MM2001/MMT2001

Digital relative humidity, and humidity & temperature sensor. 0-3 Vdc output signal.

### MQ Series – Wall Mount, Indoor/Outdoor

Temperature and Humidity Transducer

Available with or without an LCD Display

Outputs: 0-5Vdc, 0-10Vdc, 4-20mA; RS-485 Interface

### **MQ-R Series – Wall Mount with Remote Mounted Sensor**

Temperature and Humidity Transducer

Available with or without an LCD Display

Outputs: 0-5Vdc, 0-10Vdc, 4-20mA; RS-485 Interface

Standard cable length is 3'

### **MF Series – Duct Mount**

Temperature and Humidity Transducer

Available with or without an LCD Display

Outputs: 0-5Vdc, 0-10Vdc, 4-20mA; RS-485 Interface

### **MW Series – Wall Mount, Room Sensor**

Temperature and Humidity Room Sensor

Available with or without an LCD Display

Outputs: 0-5Vdc, 0-10Vdc, 4-20mA; RS-485 Interface

### **AH8002 – Portable/Handheld**

Hand Held Humidity and Temperature Meter.

### **AH8008 – Portable/Handheld**

Hand Held Humidity and Temperature Meter with data recording capability.  
Details available soon.
