

Your Measurement and Control Connection

2010 PRODUCT UPDATE

This month we are highlighting Opkon, a manufacturer of linear and rotary position sensors. Offering high quality OEM and end user products. Contact YOUR Sensor Guys, we can help you with all your measurement needs.

OPKON - Linear and Rotary Position Sensors

"SENSOR TYPES"

Resistive Linear Position Transducers

- Ranges: 30-1250mm
- Outputs: 5 k Ω , 10 k Ω , 4-20mA or 0-10Vdc

Magnetic Linear Incremental Position Sensors

- Ranges: up to 20m
- Outputs: A, A', B, B', Z, Z'

Magnetic Rotary Incremental/Absolute Encoders

- Resolution: Up to 4096 pulses/rev.
- Outputs: TTL, Totempole, Line Driver, or Voltage

Optical Rotary Incremental Position Encoders

- Resolution: Up to 500 pulses/rev.
- Outputs: TTL, Totempole, Line Driver, or Open Collector

Give us a call or visit the [opkon website](#) for more information. We look forward to solving your measurement needs. We can help! [Click here for YOUR Sensor Guys website.](#)

D&D Engineering is a sales company specializing in the application of instrumentation for measurement and control problems. It is our goal to solve our customer's measurement problems with the best technical and cost-effective solutions. Please contact one of our sales engineers for help with any measurement application you may have.

Let me know if you have any suggestions for the newsletter.

Best Regards,

Jerry Becker
